North Lebanon Township
Stormwater Management Fee Rate Study Addendum
February 12, 2018

Introduction

The purposes of this addendum are to describe the methodology used to update North Lebanon Township's property listing and ERU report, describe additional fee scenarios which would affect the fees charged to Township property owners, and describe potential updates to the Township's credit manual.

The Lebanon County Assessment Office provided an updated property listing that was effective January 8, 2018. This listing had a total of 4,395 parcels which differed from the 4,474 parcels described in the original rate study. These differences can generally be attributed to the treatment of parcels located in multiple municipalities and the addition of parcels since the database was originally obtained from the County Assessment Office on May 30, 2017. The following four sections describe the methodology used to reconcile the Township's parcel list.

Single-Family Residential (SFR) Parcel Reconciliation

SFR parcels are defined as having Land Use Codes of 101, 107, or 108 for Residential 1-Family, Condominium, or Mobile Home, respectively. The original Stormwater Management Fee Rate Study enumerated 3,743 SFR properties. Only 3,686 SFR properties were included in the January 2018 property listing, a reduction of 57. The original rate study included all SFR properties with impervious areas in North Lebanon Township, even if the properties were situated in both North Lebanon Township and a neighboring municipality. North Lebanon Township is not assessing all of these properties, however, so the properties not being assessed by North Lebanon Township were removed from the rate calculation. Additionally, a minimal number of SFR properties were added and a minimal number were converted to non-SFR land uses since May 2017 to create a net reduction of 57 SFR properties for this reconciliation.

Non-Single Family Residential (Non-SFR) Parcel Reconciliation

Any parcel which does not have a land use code of 101, 107, or 108 is classified as a Non-SFR parcel. The original Stormwater Management Fee Rate Study enumerated 731 SFR properties. Only 709 SFR properties were included in the January 2018 property listing, a difference of 22.

Sixty-three (63) Non-SFR parcels which were included in the May 2017 data set were not included in the January 2018 parcel list. These parcels were removed from the rate calculations as part of this reconciliation and are shown in Table 3 (attached) for reference. Of these 63 parcels, 50 are located partially in North Lebanon Township and partially in other municipalities. The impervious areas which were located in North Lebanon Township were charged to these parcels in the original rage study. It does not appear that North Lebanon Township is assessing these properties, therefore it would not be appropriate for these properties to be assessed a stormwater fee. Some of these parcels, such as the Greater Lebanon Refuse authority parcels, have significant impervious areas in North Lebanon Township but are actually assessed in North Annville Township. The remaining 13 Non-SFR parcels removed from the rate calculations included parcels which consisted of dedicated streets, parcels combined as part of lot addition plans, parcels which had their land use code change from a Non-SFR code to an SFR code, and one case of duplicate parcel numbers. These 63 parcels accounted for 188 ERUs.

Forty-one (41) Non-SFR parcels were added to the January 2018 parcel list that did not appear in the original stormwater fee rate study. These parcels were added to the rate calculations as part of this reconciliation and are shown in Table 4 (attached) for reference. Many of these parcels were omitted from the original stormwater fee rate study because they had no impervious area. A few were found to have impervious areas upon further inspection, and those areas were added to the rate calculations. Other parcels were created since May 2017, mainly as future residential lots. These 41 parcels accounted for 34 ERUs.

Comprehensive Parcel Review

A comprehensive review of all impervious area calculations was completed as part of this parcel reconciliation. This review allowed impervious area delineations to be double-checked and improved where necessary. The review also allowed large areas of new impervious surfaces that

were constructed after 2016 (when the aerial imagery was created) to be included in the rate calculations. The Lebanon Valley Cold Storage facility on Hanford Drive is an example of new impervious area that was added as part of this comprehensive parcel review. Fifty-nine (59) ERUs were added as a result of this comprehensive parcel review.

Summary of Parcel and ERU Totals

Table 1, below, summarizes the changes in parcel numbers and ERUs between the original rate study and the reconciled data presented in the attached Table 5. Table 5 lists every land parcel in North Lebanon Township per the parcel listing effective January 8, 2018, pertinent information regarding the ownership of the parcel, and the number of ERUs assigned to the parcel. Table 5 should be considered an updated Appendix C from the original stormwater fee rate study.

Table 1: Summary of Parcel and ERU Totals

Parcel Category	Original Rate Study (Data from May 30, 2017)	Change	New Data Effective January 8, 2018
SFR Parcels	3,743	-57	3,686
Non-SFR Parcels	731	-22	709
Total Parcels	4,474	-79	4,395
SFR ERUs	3,743	-57	3,686
Non-SFR ERUs	6,607	-95	6,512
Total ERUs	10,350	-152	10,198

As described in the section on single family residential parcel reconciliation, 57 SFR parcels were removed accounting for a reduction of 57 SFR ERUs. As described in the section on non-single family residential parcel reconciliation, 63 Non-SFR parcels were removed and 41 were added accounting for a reduction of 22 Non-SFR parcels. As described in the sections on non-single family residential parcel reconciliation and the comprehensive parcel review, 188 ERUs were removed along with the removed Non-SFR parcels, 34 ERUs were added along with the added Non-SFR parcels, and 59 ERUs were added as part of the comprehensive parcel review, accounting for a reduction of 95 Non-SFR ERUs. The Township's overall ERU count decreased from 10,350 ERUs to 10,198 ERUs.

Fee Scenarios

The second purpose of this report is to define fee scenarios which North Lebanon Township may consider. At the workshop meeting on January 16, 2018, the Supervisors decided to make several changes to the stormwater management budget which will affect the fee moving forward. These changes included:

- Removing from the budget item #4 from the original stormwater fee rate study dated September 19, 2017. This item included \$5,000.00 for record storage.
- Reducing budget item #5 from the original stormwater fee rate study dated September 19, 2017 from \$45,000.00 to \$25,000.00 to more closely match the Township's estimates for using its existing sewer billing system to bill for the stormwater management fee.
- Combining budget items #8 through #22 from the original stormwater fee rate study dated September 19, 2017 into one "Additional Services" item. These items totaled \$133,000.00 in the original rate study and are currently being paid for out of the Township's general fund or, if applicable, liquid fuels reimbursements. The Supervisors decided to budget \$75,000.00 from the stormwater management fee program to reimburse the general fund for a portion of these expenses.

The top portion of Table 6 (attached) includes these changes. Budget items in Table 6 have been renumbered due to the elimination of the line item for record storage. To avoid confusion with the item numbers presented in the original rate study, the item numbers in Table 6 (and Table 8) have been appended with the letter "A" (as in 1A, 2A, etc.).

Table 6 divides the budget items into "Base Services" and "Additional Services." The base services include all items necessary to comply with the additional requirements of the 2018 MS4 permit, and correspond to the "Minimum" level of service presented in the original fee study minus the record storage item and with the reduced billing and collection amount. The additional services are the items that the Township currently provides out of the general fund and for which the Supervisors preliminarily decided to budget \$75,000.00. The additional service items correspond to the "Moderate" level of service presented in the original fee study. The fee figures at the bottom of Table 6 indicate what the fee would be if the Township's stormwater budget included all base service items plus specified amounts of additional services ranging from zero to

the original budget figure of \$133,000.00. The additional service amounts included zero, \$25,000.00, \$50,000.00, \$75,000.00, \$100,000.00, \$125,000.00, and \$133,000.00. **As Table 6 shows, the 2018 stormwater management fee per ERU per year for a stormwater budget including all base services plus \$75,000 in additional services would be \$42.15.** This figure compares sensibly to the figures presented in the original fee rate study for the minimum level of service (\$36.70) and the moderate level of service (\$49.55). Table 5 includes the fees per property for the \$42.15 per ERU per year figure.

Additional Scenarios

Other Lebanon County municipalities have decided to waive the fee charged for privately-owned roads that are being used as public roads despite their private ownership. The rationale is that fees are not assessed to publicly-owned roads and that Township residents, delivery trucks, etc. frequently use and benefit from the privately-owned roads. In many cases these privately-owned roads are part of a development and will be dedicated to the Township sometime in the future. Access drives, such as those that serve parking lots or mobile home parks, are not included in this designation. There are 111 ERUs worth of privately-owned roads in North Lebanon Township between the Crossings at Sweetbriar, Briar Lake, and Homestead Acres residential subdivisions. These properties are called out on Table 7 (attached). All fee scenarios were run a second time with these 111 ERUs removed (making a total of 10,087 ERUs), and the results are presented in the attached Table 8. **As Table 8 shows, the 2018 stormwater management fee per ERU per year for a stormwater budget including all base services plus \$75,000 in additional services would be \$42.62 if these privately-owned roads are removed from the calculation.** As expected, the fees per ERU per year increased marginally due the reduction in ERUs. Columns were added to Table 5 to show the impervious area measurements, ERUs, and resulting fees for all properties using the \$42.62 fee figure and updated methodology that removes the privately-owned roads. The parcels with privately-owned roads are shaded.

Table 2, below, summarizes the fees for each fee scenario. The columns represent whether the privately-owned roads are included or excluded from the calculations, while the rows represent the amount of additional services that North Lebanon Township may choose to provide.

Table 2: Summary of ERU Fees for Fee Scenarios

Scenario	Fee per ERU per year, private roads included	Fee per ERU per year, private roads excluded
Base services only	\$34.80	\$35.18
Base services plus \$25,000 additional services	\$37.25	\$37.66
Base services plus \$50,000 additional services	\$39.70	\$40.14
Base services plus \$75,000 additional services	\$42.15	\$42.62
Base services plus \$100,000 additional services	\$44.60	\$45.10
Base services plus \$125,000 additional services	\$47.06	\$47.57
Base services plus \$133,000 additional services	\$47.84	\$48.37

Additional Credit Information

North Lebanon Township may choose to offer an additional type of stormwater fee credit called an “agricultural homestead exclusion credit.” A non-SFR property which is engaged in an agricultural use and has a single-family residence may be eligible for the agricultural homestead exclusion credit. This credit allows all impervious areas specifically associated with the single-family residence (the “homestead”) to be removed from the calculation of ERUs for the property and collectively assigned one additional ERU. This area is also called “curtilage” or “farmstead area” for the purposes of the Pennsylvania Clean and Green Act. The homestead area includes the primary farm residence and associated improvements such as a garage, patio, deck, pool, or shed used solely for residential purposes. The homestead exclusion shall not apply to any building or impervious surface that is used for an agricultural or other non-residential activity, including but not limited to barns, workshops, feedlots, greenhouses, silos, driveways, or gravel storage areas. All farms in North Lebanon Township were surveyed for potential agricultural homestead exclusion credits and the results are presented in Table 9 (attached). If all these property owners apply for and are granted the credits, and the Township implements a fee of \$42.15 per ERU per year, these credits would account for \$3,329.85 of the \$65,000 credit allotment. If all these property owners apply for and are granted the credits, and the Township implements a fee of \$42.62 per ERU per year, these credits would account for \$3,366.98 of the \$65,000 credit allotment. The total value of the credits given will depend on the final fee per ERU selected by the Board of Supervisors.

2018 Credit Rebates

North Lebanon Township property owners who have (an) existing BMP(s) on their property or qualify for the agricultural homestead exclusion credit will generally not apply for credits before receiving their 2018 stormwater bills. To allow these homeowners to receive the 2018 fee credit, the Township may in 2019 choose to grant one-time rebates for credit applications that were received in 2018 but could not be processed or approved before the 2018 bills were mailed. Should this occur, the property owner would receive both a credit on the 2019 fee and a rebate for the 2018 fee on their 2019 stormwater management fee bill. Granting these rebates will allow property owners to obtain the credit that they deserve for having BMPs on the ground in 2018.

Final Recommendations

We recommend that the North Lebanon Township Board of Supervisors review the information contained in this addendum report and decide if the level of funding for additional services is appropriate, if privately-owned roads should be included or excluded in the stormwater management fee program, and if the agricultural homestead exclusion credits should be provided. These decisions will allow the Township to better meet its goal of assessing stormwater fees that are manageable for owners of both large non-SFR parcels and owners of parcels billed just a single ERU.

Notes:

Agricultural properties with no homestead areas were omitted from this report.

A reduction of 79 ERUs would occur if all of these homestead exclusion credits are granted. These 79 ERUs would account for \$3,329.85 at a rate of \$42.15 per ERU and would account for \$3,366.98 at a rate of \$42.62 per ERU.
